Play Field: Master System Specification Dossier

Comprehensive PRD, TRD, App Flow, Design Brief, and Process Tracking Dossier

Executive Overview

This master dossier compiles the complete specification, technical requirements, visual design system, and verification record for the **Play Field Smart Sports Tournament Scheduling & Live Match Management System**.

PROJECT SUMMARY

Repository: https://github.com/shameel-alt/Play-Field
Database: Supabase PostgreSQL 17 (11 Relational Tables)
Frontend: React 18, Vite 6, TypeScript 5.7, Tailwind CSS 3.4
Status: 100% Production Ready

Section 1: Product Requirements (PRD)

Play Field provides an integrated tournament operating system where venue reservations, algorithmic round-robin and knockout draws, sideline scorekeeping, disciplinary forfeit automation, and instant public broadcasts converge into a single platform.

SCREEN ID	ROUTE	PRIMARY CAPABILITIES
Screen 1	`/`	Platform capabilities showcase, public preview, quick auth CTAs
Screens 2 & 3	`/login`, `/signup`	Authentication with Co-Organizer invite token verification guard
Screen 4	`/onboarding`	Sport preferences and organizer profile setup
Screen 5	`/dashboard`	Strict user filtering: displays only owned or co-managed tournaments
Screens 6–9	`/tournaments/new/*`	4–Step wizard with pre-publish conflict scan and selective payment checkout
Screen 10	`/tournaments/ongoing`	Live ongoing tournament cards with dynamic next-match court badges
Screen 11	`/tournaments/:id/manage`	Sideline scoring steppers, roster-linked Goal/Assist loggers, 3–0 Walkovers
Screen 12	`/tournaments/ended`	Champion podium, Golden Boot leaderboard, and 1200×1200px PNG summary export
Screen 13	`/public/tournament/:id`	Zero-login public stream with reactive court relocation notice banners

Section 2: Technical Architecture & Database Model (TRD)

Deployed on Supabase PostgreSQL 17 with 11 relational tables: `profiles`, `venues`, `courts`, `tournaments`, `teams`, `players`, `matches`, `match_events`, `court_booking_locks`, `organizer_invites`, and `audit_logs`.

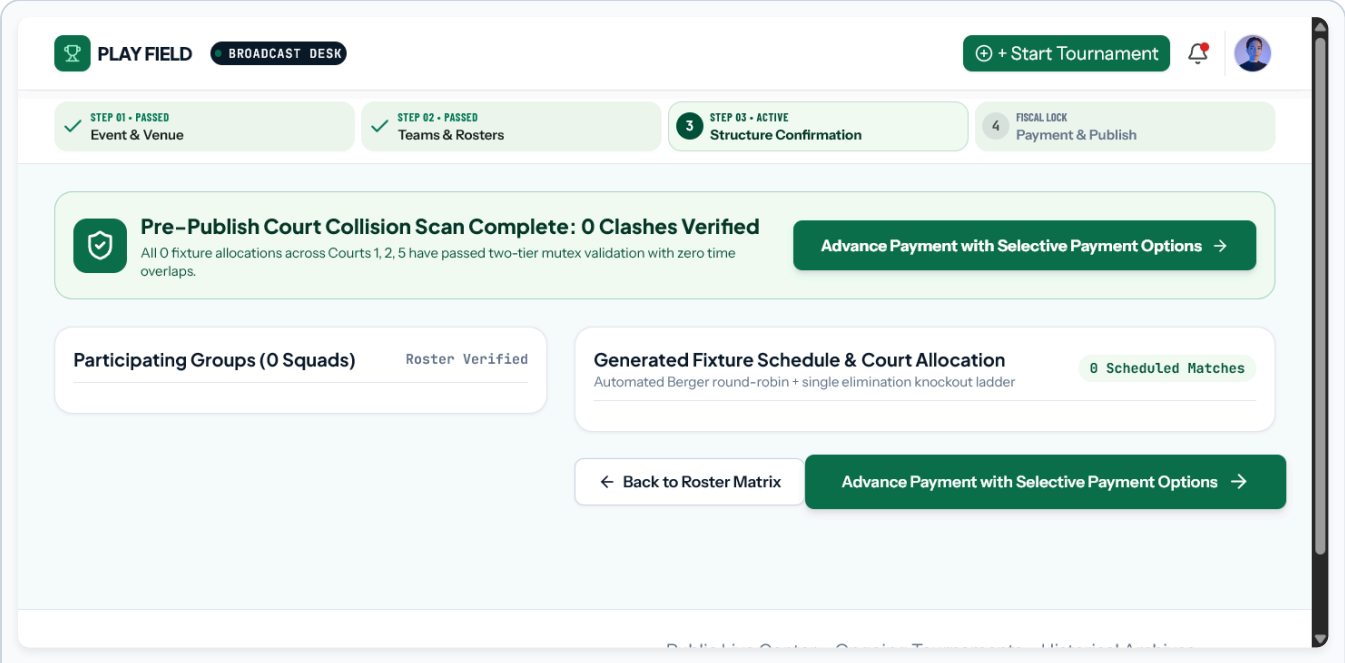

Figure A: Pre-Publish Court Collision Scan (Wizard Step 3)

Real-time two-tier mutex verification confirming zero court overlaps before payment.

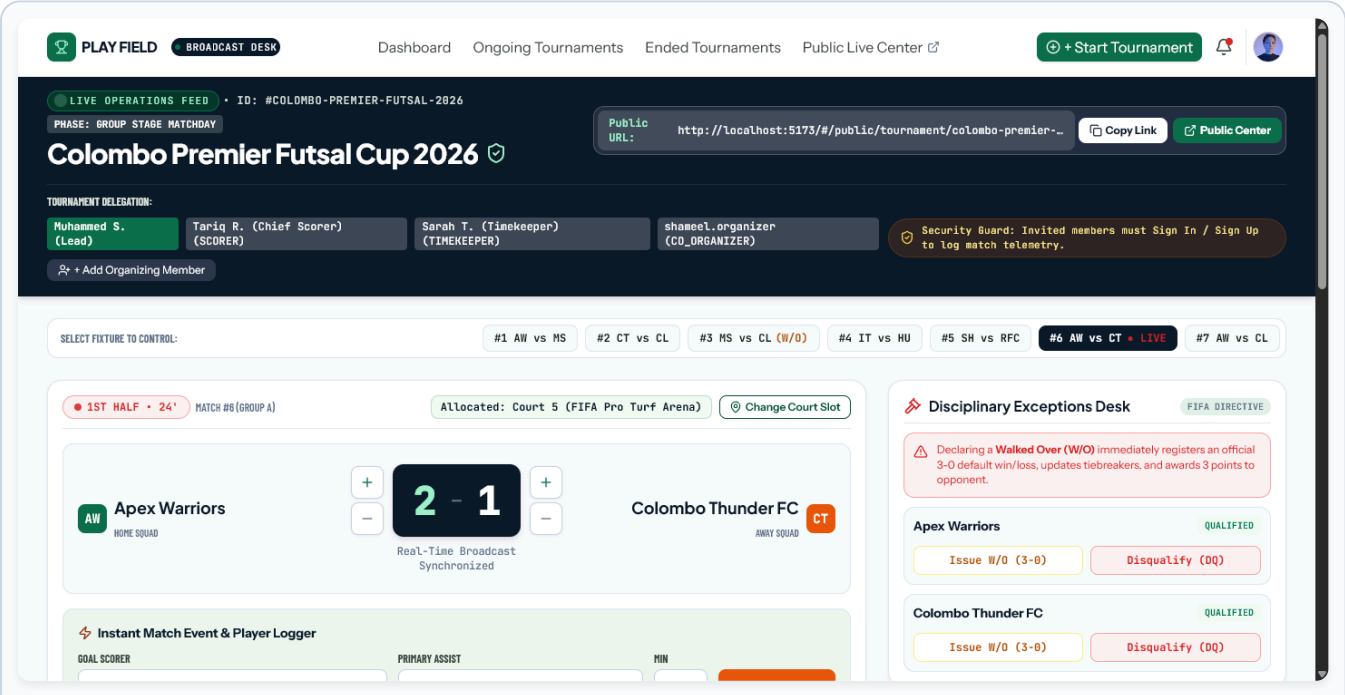

Figure B: Live Management Console (/tournaments/:id/manage)

Sideline match controllers, Goal/Assist loggers, and automated Group A & B standings.

Section 3: Visual Design & Live Fan Telemetry

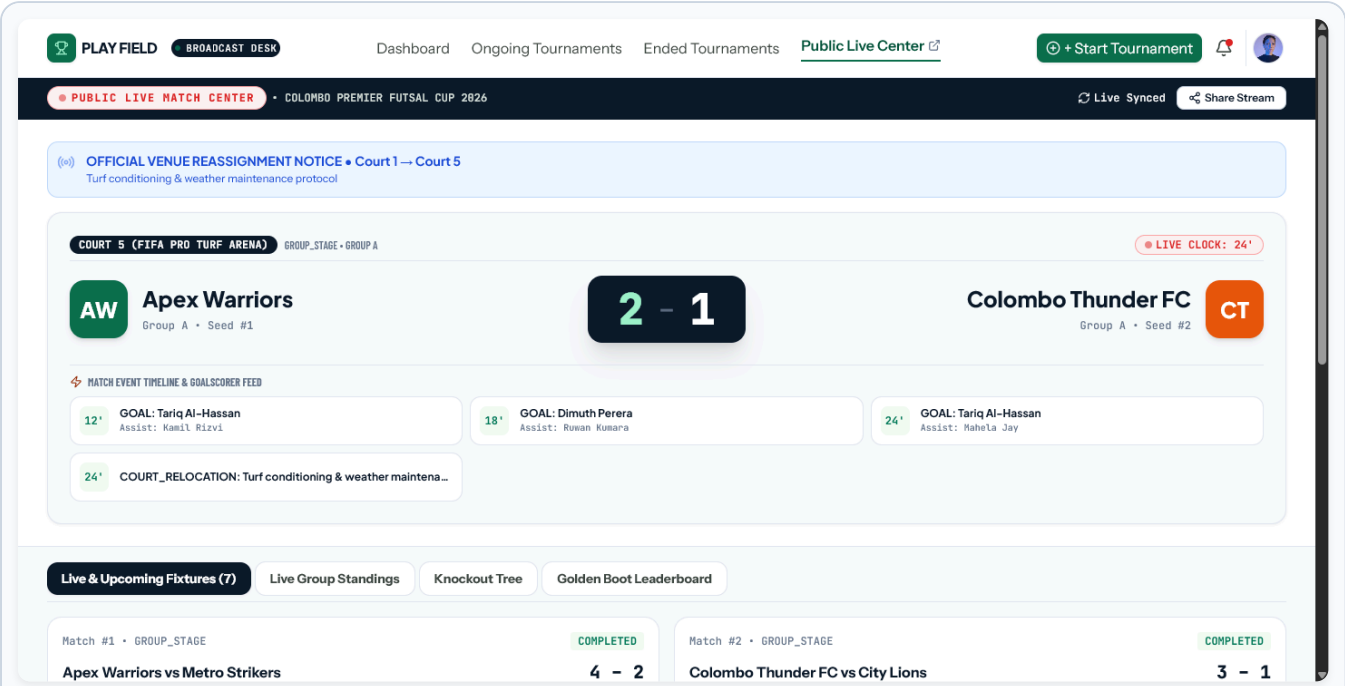

Figure C: Public Live Spectator Broadcast (/public/tournament/:id)

Real-time fan scoreboard with active clock and Official Venue Reassignment Notice Banner.

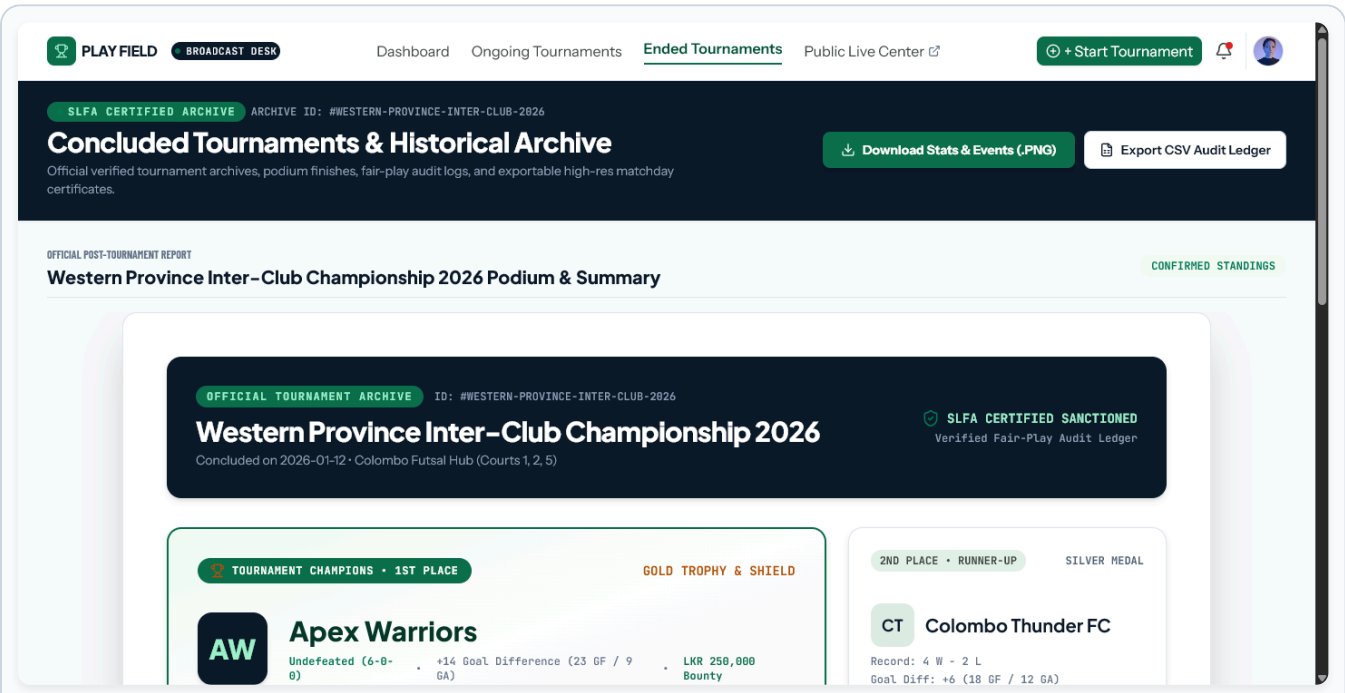

Figure D: Concluded Tournaments Podium & PNG Export (/tournaments/ended)

Accolades, Golden Boot rankings, and 1-click 1200×1200px PNG social media export.
